SUMMARY

Data Scientist with 2 years of experience leading a three-person team and building scalable data pipelines and machine learning solutions. Experienced in processing multi-source datasets, performing large-scale data transformations, and applying time series and geospatial analysis to identify patterns for forecasting and resource allocation. **Skilled in developing and optimizing machine learning models, including regression and tree-based methods, and deploying solutions using APIs and containerized environments.** Works closely with executive leadership, including the Lead Data Scientist and CEO, to translate business requirements into models and analytical frameworks, with a focus on clear communication and collaboration. **The analytics and dashboards built at Project 990 Inc. contributed to the organization winning the ARNOVA President's Award.** Apart from work, I regularly write technical blogs on LLM architectures, LangChain, data engineering, and storage systems.

EDUCATION

Professional Certification Program in FinTech

Indian Institute of Technology Delhi (IIT Delhi) | Feb 2026 - Present | Online

Master of Science in Data Science

Indiana University | Aug 2023 - May 2025 | Bloomington, Indiana, USA

Bachelor of Technology in Computer Science

Indus University | Jul 2019 - Apr 2023 | Ahmedabad, Gujarat, India

EXPERIENCE

Data Scientist

Project 990 Inc. | Jan 2025 – May 2026 | Columbus, Ohio, USA

- Implement **scalable ETL pipelines on Databricks** to **ingest financial grant data** from 7 different sources spanning from 2013 to 2021, **reducing processing time by 40%** and enabling **structured data warehousing in Snowflake** for multi-year financial analysis.
- **Merge and validate datasets** containing grant amounts and donor information using SQL. **Transform over 130,000 records** using Python, **applying predictive modeling and time series analysis** to identify grant distribution trends that supports **resource allocation and forecasting**.
- **Develop interactive Tableau dashboards** to visualize donation trends, assets to grant distribution ratios, and funding disparities. **Consult with executive leadership to define KPIs** and ensure data reproducibility by **documenting pipelines and maintaining version control using Git**.

Machine Learning Intern

ManekTech | May 2024 – Aug 2024 | Ahmedabad, Gujarat, India

- **Built a Python backend** for **AQI forecasting** with **automated data ingestion** from **REST APIs** and **developed a React.js interface** to monitor air quality trends in real time.
- **Improved data preprocessing and feature selection** for **Linear Regression and Decision Tree models**, and **improved model accuracy by 7.6%** through **hyperparameter tuning and model evaluation techniques**.
- Enabled early alerts for hazardous conditions using **data modeling techniques** and **deployed the trained model using Docker** with custom monitoring scripts, **integrating CI/CD pipelines** for automated deployment.

Data Analytics and Machine Learning Intern

Start Tech Academy | Jul 2022 – Aug 2022 | Ahmedabad, Gujarat, India

- **Built a CNN-based image classification model** and **applied NLP techniques** to analyze 2,000 image-text pairs from educational materials. **Optimized the solution using TensorFlow and Transformers, improving prediction accuracy by 11%** for text classification tasks.
- **Designed backend-to-frontend data pipelines** to track model performance and deliver insights, **incorporating A/B testing** to evaluate model outputs. **Developed Power BI and Looker dashboards** with interactive visualizations used for decision making.

PROJECTS

Insightify - RAG Based AI Knowledge Assistant | [GitHub](#)

- **Designed an AI knowledge assistant with a full RAG pipeline** to convert **10,000+ unstructured enterprise documents** including PDFs, TXT and emails into searchable insights. Used **LangChain for chunking, LangGraph for orchestration, and Sentence Transformers for embeddings**.
- **Created a FAISS vector index** with metadata for **fast semantic search**. **Integrated Hugging Face T5 models** for context-aware answers, delivering **20% faster, more accurate queries** on enterprise data.

Fraud Pattern Detection in Digital Payments | [GitHub](#)

- **Built a real time fraud detection pipeline** using **Kafka, PySpark and XGBoost** to process over 590,000 transactions. **Created window based features for transaction velocity, user activity, and risk patterns. Improved short burst fraud detection by 22%.**
- **Implemented fraud scoring with Isolation Forest, Statistical Rules, Graph Based risk signals** and achieved **8% fraud detection coverage**. Used **NetworkX** to identify fraud rings and burst patterns. **Built a React Dashboard** to display alerts, risk signals, and investigation timelines.

AWARDS

International Mathematics Olympiad (IMO) Gold Medalist (x2)

National Science Olympiad (NSO) Gold Medalist

SKILLS SUMMARY

Programming & Frameworks	: Python, SQL, R, Java, Scala, JavaScript, TypeScript, Flask, FastAPI, LangChain, LangGraph
Machine Learning & AI	: LLMs, NLP, Computer Vision, RAG, FAISS, TensorFlow, PyTorch, Hugging Face, CNN, RNN, Prompt Engineering
Cloud & Data Platforms	: AWS, Azure OpenAI Studio, Azure AI Services, GCP, BigQuery, Snowflake, Databricks
Data Engineering & Pipelines	: Alteryx, Apache Spark, PySpark, Delta Lake, Airflow, Azure Data Factory, dbt, Kafka, REST APIs
Data Visualization & BI Tools	: Tableau, Looker, Seaborn, Matplotlib, Power BI, Streamlit, Plotly, Grafana, Retool, Domo
Databases & Storage	: PostgreSQL, MySQL, MongoDB, Cassandra, Microsoft SQL Server, Elasticsearch
Infrastructure & DevOps	: Docker, Kubernetes, Azure DevOps, Git, VS Code, CI/CD, Linux, Jupyter Notebook
AI Tools & Platforms	: ElevenLabs, Resemble AI, GitHub Copilot, Cursor, Vertex AI, ChatGPT, Claude, Llama, Mistral, Gemini
Analytics Tools	: Microsoft Excel, Power Query, VBA, Power Pivot

CERTIFICATIONS

Data Science Professional (**Oracle**), Data Engineer (**AWS**), GenAI (**Indiana University**), Data Analytics (**Cisco**), SQL Fundamentals (**DataCamp**)
